"VERDE GRANDE"

Will sell at \$25 per Share until June 1st. Balance of Allotment, if Any, Will Advance to \$50 per Share on that Date.

A smelter, daily capacity 100 to 125 tons (approximate weight 80 tons), has been ordered from the Allis-Chalmers Co. of Chicago, and will be shipped from that point within 90 days. It will require about a month to get it in shape for operation after delivery at the mines.

Old miners say "Verde Grande" is the largest paying body uncovered in the history of the Mexican Republic. We believe it will prove the largest on the North American Continent.

Rider Metallic Extraction Co.

The "New Process" just discovered for the extraction of Metals from Ores and from each other (for which process patent has been applied for) is owned by the above Company.

Said "New Process" is one of the greatest discoveries of the age, if not of the world, for by the use of the same thousands of millions of dollars will be saved in the future in the extraction, reduction, separation and refining of Metals and Minerals, by reason of the cheapened methods, and the use of said process will save thousands of millions of dollars by allowing the handling of low-grade Ores which have heretofore been thrown away or allowed to remain unworked by reason of the great cost under the old methods, but such waste will be a thing of the past now, as the Rider "New Process" for extraction, separation, etc., will allow good profits to be made out of four-fifths of all low-grade Ores, which have heretofore been considered of no value. By the use of the process, Lead, Zinc, Copper, etc., can be put on the market at one-half of the present price of the same, and still with greater profits than now had by the process in general use.

The company has a small plant in operation for the demonstration of the Process, and asks one and all who may feel interested to call and see the operations for themselves.

We offer for sale, for ten days only, a very limited amount of the Capital Stock of the Company at 50 cents a share, par value \$1.00 share. Every dollar invested in the stock at present price will return to you \$1.00.

The company will be able to earn and pay 50 per cent dividend the present year.

SUMMARY OF ST. LOUIS MARKETS.

Traders who overrode on the bullish wheat reports Monday came back into the market on the ensuing day yesterday. Though somewhat belated, the bullish character of the weekly statistical news was given full weight by both local and outside traders. So far as the South and Southwest were concerned conditions were practically unchanged. Rain was reported from all sections of the winter belt and private wire advice indicated that ample moisture had been provided in nearly all sections of Kansas. So far as this was concerned, but there was too much of a good thing in the Northwest. In the spring belt, according to information received by local brokers, there were not gentle showers, but cloudbursts. It is believed that the excessive moisture will greatly reduce the spring wheat acreage.

Corn was in good outdoor demand. Though trading was not heavy, buyers were active throughout the session. Receipts were light and shipments to the South were fairly large.

July wheat opened 4 1/2 up and closed 4 1/2 up.

July corn opened 4 1/2 up and closed 4 1/2 up.

July oats closed unchanged.

Receipts of produce were below the recent average and prices were generally steady. Potatoes were a trifle easier.

Miscellaneous stocks were well supported in the local security market. Bank and trust company issues were active with slight declines. Monday's high prices.

Yesterday's bank clearings were \$2,481,613, balances \$1,627,738. Discount rates were steady between 4 1/2 and 5 1/2 per cent.

Spot cotton was quiet and unchanged in the local market.

FLOODS IN NORTHWEST CAUSE WHEAT ADVANCE.**OUTSIDE TRADERS ON BUYING SIDE.**

Monday's Losses Wiped Out and Feeling at Close Decidedly Bullish.

Following Monday's heavy slump there was a sharp recovery in the local grain market yesterday. Bullish statistical news, which had been sidetracked by weather advice, was given its full value. Though rain was still falling in many sections of the winter-wheat belt, it was reported that the condition of wheat had been greatly relieved in Kansas, most of the professional traders were lined up on the buying side. The bull card which prompted this action was the advance in the fall and fall in the spring wheat. States of the Northwest had been excessive, and that on account of the unusual moisture, the acreage in that section would probably be considerably reduced.

Bradstreet's reports the available supply of wheat east of the Rockies for the past week at 4,574,900 bu., decrease, and stocks in and about the Northwest decreased 249,000 bu., making the world's visible supply decrease 3,710,000 bu.
